

Suto Healing Center

The spread of new corona virus COVID-19 in Tokyo is dramatically increasing in last few days. Minato city, where we are located, has especially many patients suffering from COVID-19 and the large hospitals around here are changing their operation.

As you may know, chiropractic is health care profession in WHO definition. 46 countries registered chiropractic in their law. When we look at the situation in other countries, American government put chiropractic as an essential occupation to cope with this situation. They expect chiropractors to support citizens for improving their musculoskeletal symptoms and preventing severe condition. Australia government also recognize chiropractic as an essential work force to cope with this situation. Our clinic is following the guidelines of the World Federation of Chiropractic (WFC), Japanese Association of Chiropractors (JAC), and other countries to keep our practice safe and lead you appropriately as profession.

However, considering about dramatic increase of infection and what might happen in couple weeks, we made the decision as below to lower everyone's risk to be infected.

Chiropractic Treatment: we are closing from April 6th.

Bio-Energy Therapy: Long distance session through skype will be continued. We will take the reservation through the phone call or our website.

When we decide to resume our normal practice, we will let you know by this website.

Right now, we have to take a distance from each other for the prevention. However, let's unite our warm heart together to overcome this challenging situation.

We are always wishing you a good health from bottom of our heart.
