Our Policy for the state of emergency in 2021

We are happy and grateful to perform treatment for you and appreciate your trust and continuous support with our clinic.

Under these circumstances we appreciate everyone, everywhere who is working to keep us safe and taking care of people who are suffering from COVID-19. We would like to express our condolences for the people passed away from it and pray for the recovery of those who are suffering from the infection.

As you may know, Japanese government declared a second state of emergency in Tokyo, Kanagawa, Saitama and Chiba prefectures on Thursday January the 7th because of the spreading of COVID-19.

Our clinic has been practicing since 1997 as an integrated alternative medicine clinic. We think of ourselves as equivalent to medical facilities. Since we resumed our practice in June 2020 after the first lockdown, we have been asking everyone to follow our COVID19 policy (which is based on Japanese Association of Chiropractors' guidelines, available on our website). We will continue performing the treatment for our clients following our policy until the spread of infection diminished. Also, for both bioenergy work and chiropractic we will continue providing remote sessions for our clients who cannot visit our clinic.

We want to perform the treatment for you to keep your lives happy and healthy even under these circumstances.
